WYTHEVILLE ENTERPRISE

Business update

Horizon Healthcare Management Inc.

According to a press release, Dennis Counts, founder of long-term care pharmacy Horizon Healthcare Management Inc., has announced the sale of his business to family friends Chad and Marybeth Terry. His former company served residents of long-term care and group homes including assisted living, skilled nursing and hospice communities.

The Terrys are the founders of Southern Pharmacy Services with locations in North Carolina, the press release said. They will continue to operate Horizon Healthcare Management as an independent pharmacy with local decision making under the leadership of head pharmacist Renae Crigger, who has been promoted to director of operations.

Counts will continue his involvement assisting Crigger to ensure a seamless transition, noted the release.
